

GYULA (*Jules*) PLANKY

New York City | gyuszix@gmail.com | +1 (646) 529-3492 | linkedin.com/in/julesplanky | github.com/gyuszix

Software engineer with a finance background — Go, Python, and C#/.NET across distributed systems, ML pipelines, and cloud infrastructure.

EDUCATION

- Northeastern University, Khoury College of Computer Sciences** Boston, MA
• *Master of Science (MS) in Computer Science* 2024 – 2026
Coursework: Algorithms, OOP, Distributed Systems, Cloud Computing, Deep Learning, MLOps
- ESCP Europe** Paris, Madrid, Berlin
• *Bachelor of Science (BS) in Business Management* 2017 – 2020

EXPERIENCE

- Xapt** New York City
• *Technical Consultant / Developer* | C#, EF Core, X++, SQL, Azure, Power Platform Aug 2025 – Present
 - Develop and maintain backend logic on Microsoft Dynamics 365 Finance & Operations, writing X++ business logic and C# extensions across finance and operations modules.
 - Build EF Core migrations against SQL Server and administer Linux-based Azure VMs supporting client deployments.
 - Work across the Power Platform (Power Automate, Power BI) to extend Dynamics workflows and reporting for client-specific requirements.
- Morgan Stanley Capital International**
• *Fixed Income Reference Data Analyst/Dev* | Python, Perl, SQL, Bash, Git, Linux 2022 – 2023
 - Led** a Perl-to-Python **migration** of a legacy production system end to end — scoping, cutover sequencing, and a data-quality layer catching 95% of regressions at **85% test coverage**.
 - Ran daily operation of reference-data services for 7,000+ downstream users, processing **3M+ instruments daily** at **99.999% uptime**.
 - Drove a performance optimization **from 45 to 25 minutes**, partnering with tech and business stakeholders on root-cause fixes.
- Morgan Stanley**
• *Treasury Analyst* | Python, Pandas, Power BI, SQL 2021 – 2022
 - Built Python tooling feeding Power BI dashboards that automated **liquidity monitoring** across **20+ legal entities** — a daily view over \$50B+ in positions.
 - Replaced 10+ legacy VBA processes for daily regulatory reporting, cutting report generation **from 2 hours to 15 minutes**.

TECHNICAL PROJECTS

- Bluebikes Demand Prediction System** | XGBoost, FastAPI, Apache Airflow, GCP Cloud Run, Evidently
Production ML pipeline forecasting bike demand in Boston, MA; trained ensemble model (**$R^2=0.87$**), deployed as a FastAPI service with automated Airflow retraining and Evidently-based drift detection.
- Personal Finance Tracker** | C#, ASP.NET Core, .NET MAUI, EF Core, PostgreSQL, Plaid API
Cross-platform finance app connecting to bank accounts via Plaid; server-side credential handling, encrypted rotating JWT refresh tokens, and EF Core global query filters for per-user isolation.
- Home Assistant / Zigbee Smart Home System** | Raspberry Pi, ESP32, Docker, MQTT, Tailscale
Self-hosted home automation stack across three Raspberry Pi devices: HA Core in Docker, a custom ESP32-C6 Zigbee coordinator (ZBOSS NCP over GPIO UART, no USB dongle) running Zigbee2MQTT + Mosquitto, all reachable only over Tailscale.

SKILLS

Programming Languages: Go, Python, JavaScript, SQL, Bash, C#; Java, Perl

Frameworks: ASP.NET Core, FastAPI, Flask, Django, React, Node.js, Express, gRPC

ML / AI: PyTorch, ONNX, Hugging Face, scikit-learn, Pandas, NumPy, MLflow, Airflow, Evidently

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis

Infrastructure / Tools: Docker, Kubernetes, Terraform, AWS, Azure, GCP, GitHub Actions, Tailscale

Spoken Languages: Spanish ☒ French ☒ German ☒
